

RadarPlatform provides a turnkey solution for organizations and MSSP to build and run a superior Cyber Defense Center. It provides and integrates Cyber Risk Detection functionality, core Cyber Defense Center technology from Europe's technology leader and empowerment services to efficiently set up and run an effective Cyber Defense Center. MSSP are enabled to provide billable services within 3 months or less.

## Challenge Meets Solution

- Lack of know-how & processual design to build and run a CDC
- Absence of experienced talent dedicated to detection intelligence & use cases

- Lack of personnel, budget & time for technology integration

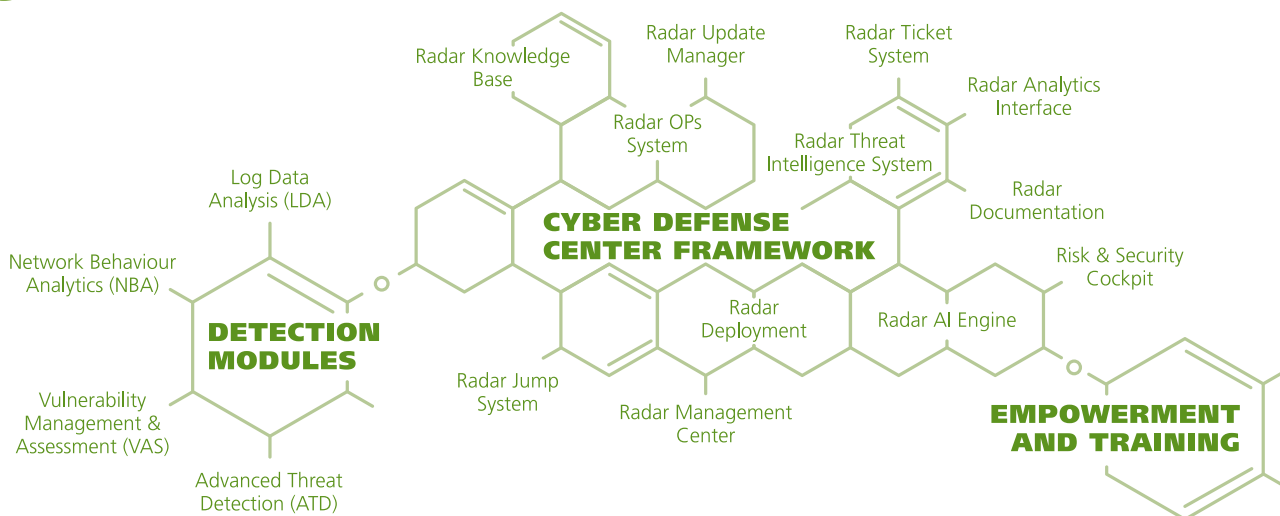

- CDC solution cost model impedes comprehensive analysis
- Limited capability to offer on-premise & cloud deployments

- Turnkey solution for MSSP & CDC deployments
- Detection intelligence updates & use cases from Europe's largest CDC

- Go live of CDC in weeks vs. years
- Proven process guidelines & training for analysts

- End-to-end functionality
- Scalable pay-as-you-grow CDC platform for MSSP customer base

## RadarPlatform In a Nutshell

### RadarPlatform combines technology, process guidelines and training.

Fully integrated, it contains the most important technologies to detect cyber risks in IT & OT infrastructure and a full technology stack to securely run a Cyber Defense Center. RadarPlatform is the turnkey solution for MSSP and organizations running their CDC. The proven Radar technology, process and service know-how that are delivered as part of this unparalleled solution allow for MSSP to provide a fast-track methodology to offer CDC services for their client base.
