

We are Europe's Leader for
Detection & Response

To strengthen our team in 1070 Vienna, we are hiring a

Senior Developer - Python & GoLang (f/m/x)

Full time

Your Responsibilities

- » Development of high-performance backend tools for risk detection
- » High performance processing of data from our customers networks (big data)
- » Design of the software architecture with the team of developers
- » Determine software requirements along with the product owner

Your Qualifications

- » Good knowledge of Python and GoLang
- » Solid Unix know-how
- » Know-how of modern distributed systems
- » Experience with version control tools (preferably git)
- » Familiar with SQL database systems (PostgreSQL, SQLite)
- » Knowledge of data structures, algorithms, ORM concepts and the basics of software testing
- » Experience with concurrent programming in a POSIX environment (coroutines, threading, multiprocessing)
- » Good command of the English language, spoken and written (it is the company language)
- » Enjoyment of both self-reliant tasks and working in a team
- » And of course: Interest in IT security!

What we offer

- » Developing innovative products in an international team
- » A people-oriented environment with agile working methods
- » Self-reliant working with flexible working hours
- » Continuous education and skills development as well as regular feedback sessions
- » An office with very good traffic connections (metro)
- » Free coffee, tea, soft-drinks and fruits

We offer an annual gross salary between € 60.000.- and € 70.000.- for a full-time employment (38,5 hours per week). The actual salary depends on previous experience and qualifications.
