

We are Europe's leader for Detection & Response

To strengthen our team in 1070 Vienna, we are hiring a

Site Reliability Engineer (f/m/x)

Full time

Your Responsibilities

- » Shape the way how we orchestrate infrastructure and its operations
- » Support the engineering and operations teams with a DevOps and Engineer mindset
- » Focus on automation and reliability with both in-house developed and well-known OSS cloud operating models
- » Collaborate and participate towards technology and framework improvement and innovation
- » Take care of technology deployments and their automated system management

Your Qualifications

- » Very good knowledge and experience with container technologies, especially LXC
- » Excellent skills in Debian Linux (incl. networking, firewalling, VPNs and system provisioning)
- » Experience with multiple automation and provisioning technologies
- » Experience with Golang and Hashicorp technologies is a big plus
- » Beneficial is experience with automated testing, system- or software architecture design and configuration management
- » Eager to constantly expand your knowledge by yourself and in exchange with colleagues
- » Good command of English Language
- » And of course: Interest in IT security!

What we offer

- » Working with innovative products in an international team
- » A people-oriented environment with agile working methodology
- » Self-reliant working with flexible working hours
- » An office with very good traffic connections (metro)
- » Free coffee, tea, soft-drinks and fruits

According to the collective agreement, the minimum annual gross salary for this position is between € 35,784.- and € 43,316.- for a full-time employment (38,5 hours per week). The actual salary will be in line with previous experience and qualifications.
