

Materna Radar Cyber Security (MRCS) bundles future-oriented solutions of the Materna Group with the aim of strengthening the cyber resilience of modern organizations from a single source. Those solutions include holistic cyber security consulting as well as SOC services and solutions operated in Europe. The portfolio is complemented by all security products from the group corporation. Our SOC in Vienna and Dortmund unites international cyber security experts with a mindset of quality, solution orientation and sustainability. Thereby they share the same passion: safeguarding tomorrow's digital world.

Join our team in **Vienna** and apply as (f/m/x, full time)

Cybersecurity Analyst

Your Responsibilities

- » Analyze cyber security events in our customers' environments, assess their criticality (triage) and recommend actions to our customers for risk mitigation
- » Perform vulnerability scans for assets in our customers' environment and report results
- » Develop, maintain and improve detection rules and use cases for our SIEM system
- » Automate recurring task by means of scripting, enhance automated correlation and detection capabilities
- » Communicate with our customers through our integrated workflow platform for cyber security event handling and other means, support customers in remediating cyber security incidents
- » Keep abreast of latest information about current and emerging cyber threats

Your Qualifications

- » Completed technical college in IT or equal education/experience in the cyber security area
- » Experience with cyber security technology, concepts and products, such as endpoint protection, vulnerability management, SIEM, EDR and risk management
- » Familiar with using Linux (Debian)
- » Good knowledge in configuration and system hardening for Windows operating systems
- » Knowledge of script languages, preferable Python
- » Good command of the English Language
- » And of course: Interest in Cybersecurity!

What we offer

- » Providing innovative services in an international team, committed to combine its strengths
- » Self-reliant working with room for curiosity to find creative solutions
- » Flexible working hours based on 38.5 hours/week
- » Continuous competence development
- » An office with very good traffic connections (metro)

It is important for us to offer salaries that are in line with previous experience and qualifications. To fulfil legal requirements, we point to the minimum annual gross salary stated in the collective agreement for employees of service providers in the field of automatic data processing and information technology of € 43,078.- for a full-time employment (38.5 hours/week). Please feel free to share your salary expectation.
